SUMMARY

Mobile engineer building cross-platform Flutter products for security, logistics, and ERP teams, plus Python and JavaScript AI workflows grounded in project knowledge. Strongest work sits inside operations-heavy products that must stay reliable on weak networks, in the field, and under real operational pressure. Open to full-time roles and high-impact freelance work.

EXPERIENCE

Novus Altair UK ? Mobile App Developer

May 2025 - Present

- Building cross-platform products and contributing to Optima AI Factory, an AI-assisted engineering workspace for grounded agents and improving software workflows.
- Built Python- and JavaScript-based agent workflows grounded in project wikis, plans, and code through MCP-connected retrieval.
- Connected isolated development sandboxes, live previews, automated QA runs, and feedback into reviewable software-delivery loops.
- Implemented app flows that connect mobile users with ERP-backed business processes.

Lakhani Development Services ? Mobile App Developer

Sep 2024 - May 2025

- Led mobile work for security operations and field-force control products across Android and iOS.
- Delivered GPS tracking, geofencing, SOS handling, and NFC checkpoint verification.
- Built features for patrol workflows, incident reporting, and real-time monitoring.

Urwasoft ? Mobile App Developer

May 2024 - Sep 2024

- Developed mobile experiences for freight management and ERP-linked supply chain products.
- Focused on performance tuning and product stability during active development.

Wenawa ? Software Engineer Intern

Jan 2024 - May 2024

- Collaborated on Flutter products, feature work, and reusable module improvements.
- Worked on reusable Flutter modules to speed up future feature delivery.

SKILLS

Core Stack: Flutter, React Native, JavaScript, Firebase

Mobile Systems: GPS and Geofencing, NFC Integration, SQLite, Offline Sync, Push Notifications, Biometric Verification

Backend and Real-time: RESTful APIs, Socket.IO, ERP Integration, Firebase Cloud Messaging, PDF Reporting

AI Systems and Automation: Python, JavaScript, Grounded RAG, Model Context Protocol (MCP), Agent Workflows, Docker Sandboxes, Automated QA

Delivery Support: HTML and CSS, WordPress, Manual SQA, QA Collaboration

SELECTED PROJECTS

Novus Guard Control Security Operations Platform

Admin-focused mobile control panel for managing security operations: live patrol monitoring, SOS response context, watchlists, and coordination across organizations, sites, teams, and live events. Published on the App Store and Google Play.

Novus Guard Pro Field Officer App

Field app for GPS-aware and indoor patrols, QR/NFC checkpoint verification, wearable safety devices, site cameras, incident reporting, and real-time communications. Published on the App Store and Google Play.

Rayan Driving Instructor Consumer Service App

Branded mobile app experience for a driving instructor business, presenting services in a polished, trustworthy way.

Optima AI Factory AI-assisted software delivery

Engineering workspace for grounded agents, isolated Docker development, automated QA, and feedback-driven delivery workflows built around real product context.

LDS E-Invoicing System Enterprise Tool

Invoice creation and tracking app tied to backend APIs and digital invoicing rules.

Happilac Paints CRM CRM Application

CRM mobile app with dashboards, service tickets, attendance tracking, and secure API-backed flows.

EDUCATION

B.Sc. Computer Science, Sir Syed University of Engineering and Technology ? graduated 2024.
